Conquering C

Controversies in HCV care for transplant patients

Monday 14 September 2015, 13.00–14.00

Gold Hall, Square – Brussels Meeting Centre, Brussels, Belgium

Welcome

Dear Colleagues

It is our great pleasure to invite you to attend the Gilead-sponsored satellite symposium 'Conquering C – controversies in HCV care for transplant patients' to be held at 13.00–14.00 on Monday 14 September 2015, during the 17th Congress of the European Society for Organ Transplantation (ESOT) in Brussels, Belgium.

The treatment landscape for hepatitis C virus (HCV) infection has entered an era where the availability of highly efficacious and well-tolerated treatment regimens has raised expectations in terms of cure in all patient groups. The management of HCV in patients in the transplant setting remains a topic of much debate. During this symposium we will discuss the data that illustrate how direct-acting antiviral agents can bring treatment benefits to transplant patients. An expert faculty will debate three key controversies in the management of HCV in transplant patients, and share experiences and opinions on how treatment advances can be best applied in practice.

We do hope you can join us for what promises to be an insightful and stimulating symposium.

Michael Manns (Germany)
Chair

Programme

Conquering C – advances in care for transplant patients	Michael Manns (Germany)
Pre-transplant vs post-transplant treatment?	Marina Berenguer (Spain) Didier Samuel (France)
MELD purgatory – fact or fiction?	Didier Samuel (France) Kosh Agarwal (UK)
Are there patients beyond therapy?	Kosh Agarwal (UK) Marina Berenguer (Spain)
Conquering C – solutions for HCV care in transplantation	Michael Manns (Germany)
