

Symposium Invitation

The journey to improve kidney transplant patients' unmet needs

Monday, 14 September, 13:00–14:00

Copper Hall, The Square, Brussels, Belgium

On behalf of Novartis Pharma AG and the members of our expert panel, Prof. Josep Campistol, Prof. Christophe Legendre and Dr Frank Lehner, we are delighted to invite you to this unique symposium session of ESOT 2015 Congress.

This dynamic session will centre upon a patient video case study, combined with on-stage expert discussions, exploring the best treatment options available for kidney transplant patients. We will meet Alexander, a father of young children, who is suffering from renal failure. Alexander recently underwent kidney transplantation. Through telling his story, our experts will reflect on how to improve long-term outcomes in kidney transplantation and how to identify the most relevant treatment options available.

We very much look forward to welcoming you to an innovative and rewarding symposium meeting.
